The American College and University Frederick Rudolph, 1990 First published in 1962, Frederick Rudolph's groundbreaking study, *The American College and University*, remains one of the most useful and significant works on the history of higher education in America. Bridging the chasm between educational and social history, this book was one of the first to examine developments in higher education in the context of the social, economic, and political forces that were shaping the nation at large. Surveying higher education from the colonial era through the mid-twentieth century, Rudolph explores a multitude of issues from the financing of institutions and the development of curriculum to the education of women and blacks, the rise of college athletics, and the complexities of student life. In his foreword to this new edition, John Thelin assesses the impact that Rudolph's work has had on higher education studies. The new edition also includes a bibliographic essay by Thelin covering significant works in the field that have appeared since the publication of the first edition. At a time when our educational system as a whole is under intense scrutiny, Rudolph's seminal work offers an important historical perspective on the development of higher education in the United States.

Navigating College Melody Latimer, 2013-07 Leaving high school and going to college is complicated for everyone. But if you're a student on the autism spectrum who is about to enter higher education for the first time, it might be a little bit more complicated for you. Maybe you're worried about getting accommodations, getting places on time, or dealing with sensory issues in a new environment. Maybe you could use some advice on how to stay healthy at school, handle dating and relationships, or talk to your friends and classmates about your disability. Maybe you want to talk to someone who's already

dealt with these issues. That's where we come in. Navigating College is an introduction to the college experience from those of us who've been there. The writers and contributors are Autistic adults, and we're giving you the advice that we wish someone could have given us when we headed off to college. We wish we could sit down and have a chat with each of you, to share our experiences and answer your questions. But since we can't teleport, and some of us have trouble meeting new people, this book is the next best thing. So as you go back to school, check out a copy of Navigating College for yourself or your loved one. We've done this all before--let us help you out.

Colleges That Change Lives Loren Pope,2006-07-25 Prospective college students and their parents have been relying on Loren Pope's expertise since 1995, when he published the first edition of this indispensable guide. This new edition profiles 41 colleges—all of which outdo the Ivies and research universities in producing performers, not only among A students but also among those who get Bs and Cs. Contents include: Evaluations of each school's program and personality Candid assessments by students, professors, and deans Information on the progress of graduates This new edition not only revisits schools listed in previous volumes to give readers a comprehensive assessment, it also addresses such issues as homeschooling, learning disabilities, and single-sex education.

How to College Andrea Malkin Brenner,Lara Hope Schwartz,2019-04-23 The first practical guide of its kind that helps students transition smoothly from high school to college The transition from high school—and home—to college can be stressful. Students and parents often arrive on campus unprepared for what college is really like. Academic standards and expectations are different from high school; families aren't present to serve as “scaffolding” for students; and first-years have to do what they call “adulthood.” Nothing in the college admissions process prepares students for these new realities. As a result, first-year college students report higher stress, more mental health issues, and lower completion rates than in the past. In fact, up to one third of first-year college students will not return for their second year—and colleges are reporting an increase in underprepared first-year students. How to College is here to help. Professors Andrea Malkin Brenner and Lara Schwartz guide first-year students and their families through the transition process, during the summer after high school graduation and throughout the school year, preparing students to succeed and thrive as they transition and adapt to college. The book draws on the authors' experience teaching, writing curricula, and designing programs for thousands of first-year college students over decades.

Cheating in College Donald L. McCabe,Kenneth D. Butterfield,Linda K. Treviño,2012-09-11 Today's students are tomorrow's leaders, and the college years are a critical period for their development of ethical standards. Cheating in College explores how and why students cheat and what policies, practices, and participation may be useful in promoting academic integrity and reducing cheating. The authors investigate trends over time, including internet-based cheating. They consider personal and situational explanations, such as the culture of groups in which dishonesty is more common (such as business

majors) and social settings that support cheating (such as fraternities and sororities). Faculty and administrators are increasing their efforts to promote academic honesty among students. Orientation and training sessions, information on college and university websites, student handbooks that describe codes of conduct, honor codes, and course syllabi all define cheating and establish the consequences. Based on the authors' multiyear, multisite surveys, *Cheating in College* quantifies and analyzes student cheating to demonstrate why academic integrity is important and to describe the cultural efforts that are effective in restoring it. -- Gary Pavela, Syracuse University

A Dream Called Home Reyna Grande, 2019-07-02 From bestselling author of the remarkable memoir, *The Distance Between Us* comes an inspiring account of one woman's quest to find her place in America as a first-generation Latina university student and aspiring writer determined to build a new life for her family one fearless word at a time. "Here is a life story so unbelievable, it could only be true" (Sandra Cisneros, bestselling author of *The House on Mango Street*). As an immigrant in an unfamiliar country, with an indifferent mother and abusive father, Reyna had few resources at her disposal. Taking refuge in words, Reyna's love of reading and writing propels her to rise above until she achieves the impossible and is accepted to the University of California, Santa Cruz. Although her acceptance is a triumph, the actual experience of American college life is intimidating and unfamiliar for someone like Reyna, who is now estranged from her family and support system. Again, she finds solace in words, holding fast to her vision of becoming a writer, only to discover she knows nothing about what it takes to make a career out of a dream. Through it all, Reyna is determined to make the impossible possible, going from undocumented immigrant of little means to "a fierce, smart, shimmering light of a writer" (Cheryl Strayed, author of *Wild*); a National Book Critics Circle Award Finalist whose "power is growing with every book" (Luis Alberto Urrea, Pulitzer Prize finalist); and a proud mother of two beautiful children who will never have to know the pain of poverty and neglect. Told in Reyna's exquisite, heartfelt prose, *A Dream Called Home* demonstrates how, by daring to pursue her dreams, Reyna was able to build the one thing she had always longed for: a home that would endure.

The College Board Book of Majors College Entrance Examination Board, 2004 Picking a college major is a two-step process: First, you have to discover which areas of study interest you the most; then you need to find out which colleges offer

those majors. The College Board Book of Majors is the only resource that helps you do both. Whether you're just beginning to look at colleges or have already enrolled, you'll find what you need to know about every major -- from accounting to zoology -- offered in every college from Maine to Hawaii. Book jacket.

Choosing College Michael B. Horn, Bob Moesta, 2019-09-11 Cut through the noise and make better college and career choices This book is about addressing the college-choosing problem. The rankings, metrics, analytics, college visits, and advice that we use today to help us make these decisions are out of step with the progress individual students are trying to make. They don't give students and families the information and context they need to make such a high-stakes decision about whether and where to get an education. Choosing College strips away the noise to help you understand why you're going to school. What's driving you? What are you trying to accomplish? Once you know why, the book will help you make better choices. The research in this book illustrates that choosing a school is complicated. By constructing more than 200 mini-documentaries of how students chose different postsecondary educational experiences, the authors explore the motivations for how and why people make the decisions that they do at a much deeper, causal level. By the end, you'll know why you're going and what you're really chasing. The book: Identifies the five different Jobs for which students hire postsecondary education Allows you to see your true options for what's next Offers guidance for how to successfully choose your pathway Illuminates how colleges and entrepreneurs can build better experiences for each Job The authors help readers understand not what job students want out of college, but what Job students are hiring college to do for them.

Redesigning America's Community Colleges Thomas R. Bailey, Shanna Smith Jaggars, Davis Jenkins, 2015-04-09 In the United States, 1,200 community colleges enroll over ten million students each year—nearly half of the nation's undergraduates. Yet fewer than 40 percent of entrants complete an undergraduate degree within six years. This fact has put pressure on community colleges to improve academic outcomes for their students. Redesigning America's Community Colleges is a concise, evidence-based guide for educational leaders whose institutions typically receive short shrift in academic and policy discussions. It makes a compelling case that two-year colleges can substantially increase their rates of student success, if they are willing to rethink the ways in which they organize programs of study, support services, and instruction. Community colleges were originally designed to expand college enrollments at low cost, not to maximize completion of high-quality programs of study. The result was a cafeteria-style model in which students pick courses from a bewildering array of choices, with little guidance. The authors urge administrators and faculty to reject this traditional model in favor of "guided pathways"—clearer, more educationally coherent programs of study that simplify students' choices without limiting their options and that enable them to complete credentials and advance to further education and the labor market more quickly and at less cost. Distilling a wealth of data amassed from the Community College Research Center (Teachers College, Columbia University), Redesigning America's Community Colleges offers a fundamental redesign of the

way two-year colleges operate, stressing the integration of services and instruction into more clearly structured programs of study that support every student's goals.

Native Presence and Sovereignty in College Amanda R. Tachine, 2022 What is at stake when our young people attempt to belong to a college environment that reflects a world that does not want them for who they are? In this compelling book, Navajo scholar Amanda Tachine takes a personal look at 10 Navajo teenagers, following their experiences during their last year in high school and into their first year in college. It is common to think of this life transition as a time for creating new connections to a campus community, but what if there are systemic mechanisms lurking in that community that hurt Native students' chances of earning a degree? Tachine describes these mechanisms as systemic monsters and shows how campus environments can be sites of harm for Indigenous students due to factors that she terms monsters' sense of belonging, namely assimilating, diminishing, harming the worldviews of those not rooted in White supremacy, heteropatriarchy, capitalism, racism, and Indigenous erasure. This book addresses the nature of those monsters and details the Indigenous weapons that students use to defeat them. Rooted in love, life, sacredness, and sovereignty, these weapons reawaken students' presence and power. Book Features: Introduces an Indigenous methodological approach called story rug that demonstrates how research can be expanded to encompass all our senses. Weaves together Navajo youths' stories of struggle and hope in educational settings, making visible systemic monsters and Indigenous weaponry. Draws from Navajo knowledge systems as an analytic tool to connect history to present and future realities. Speaks to the contemporary situation of Native peoples, illuminating the challenges that Native students face in making the transition to college. Examines historical and contemporary realities of Navajo systemic monsters, such as the financial hardship monster, deficit (not enough) monster, failure monster, and (in)visibility monster. Offers insights for higher education institutions that are seeking ways to create belonging for diverse students.

What the Best College Students Do Ken Bain, 2012-08-27 The author of the best-selling What the Best College

Teachers Do is back with more humane, doable, and inspiring help, this time for students who want to get the most out of college—and every other educational enterprise, too. The first thing they should do? Think beyond the transcript. The creative, successful people profiled in this book—college graduates who went on to change the world we live in—aimed higher than straight A's. They used their four years to cultivate habits of thought that would enable them to grow and adapt throughout their lives. Combining academic research on learning and motivation with insights drawn from interviews with people who have won Nobel Prizes, Emmys, fame, or the admiration of people in their field, Ken Bain identifies the key attitudes that distinguished the best college students from their peers. These individuals started out with the belief that intelligence and ability are expandable, not fixed. This led them to make connections across disciplines, to develop a “meta-cognitive” understanding of their own ways of thinking, and to find ways to negotiate ill-structured problems rather than simply looking for right answers. Intrinsically motivated by their own sense of purpose, they were not demoralized by failure nor overly impressed with conventional notions of success. These movers and shakers didn't achieve success by making success their goal. For them, it was a byproduct of following their intellectual curiosity, solving useful problems, and taking risks in order to learn and grow.

How to Succeed in College (While Really Trying) Jon B. Gould,2012-04-02 After years of preparation and anticipation, many students arrive at college without any real knowledge of the ins and outs of college life. They've been focused on finding the right school and have been carefully guided through the nuances of the admissions process, but too often they have little knowledge about how college will be different from high school or what will be expected of them during that crucial first year and beyond. Written by an award-winning teacher, *How to Succeed in College (While Really Trying)* provides much-needed help to students, offering practical tips and specific study strategies that will equip them to excel in their new environment. Drawing on years of experience teaching at a variety of campuses, from large research universities to small liberal arts colleges, Jon B. Gould gives readers the lay of the land and demystifies the college experience. In the course of the book, students will learn how to identify the best instructors, how to choose classes and settle on a major, how to develop effective strategies for reading and note taking, and how to write good papers and successfully complete exams. Because much of the college experience takes place outside of the classroom, Gould also advises students on how to effectively manage their cocurricular activities, work obligations, and free time, as well as how to take advantage of the typically untapped resources on every campus. With candid advice and insights from a seasoned insider, this guide will leave students better prepared not only to succeed in college but to enjoy it as well.

Making the Most of College Richard J. Light,2004-05-30 Why do some students make the most of college, while others struggle and look back on years of missed deadlines and missed opportunities? What choices can students make, and what

can teachers and university leaders do, to improve more students' experiences and help them achieve the most from their time and money? Most important, how is the increasing diversity on campus—cultural, racial, and religious—affecting education? What can students and faculty do to benefit from differences, and even learn from the inevitable moments of misunderstanding and awkwardness? From his ten years of interviews with Harvard seniors, Richard Light distills encouraging—and surprisingly practical—answers to fundamental questions. How can you choose classes wisely? What's the best way to study? Why do some professors inspire and others leave you cold? How can you connect what you discover in class to all you're learning in the rest of life? Light suggests, for instance: studying in pairs or groups can be more productive than studying alone; the first and most important skill to learn is time management; supervised independent research projects and working internships offer the most learning and the greatest challenges; and encounters with students of different religions can be simultaneously the most taxing and most illuminating of all the experiences with a diverse student body. Filled with practical advice, illuminated with stories of real students' self-doubts, failures, discoveries, and hopes, *Making the Most of College* is a handbook for academic and personal success.

Intersectionality and Higher Education W. Carson Byrd, Rachele J. Brunn-Bevel, Sarah M. Ovink, 2019-05-03 Though colleges and universities are arguably paying more attention to diversity and inclusion than ever before, to what extent do their efforts result in more socially just campuses? *Intersectionality and Higher Education* examines how race, ethnicity, class, gender, sexuality, sexual orientation, age, disability, nationality, and other identities connect to produce intersected campus experiences. Contributors look at both the individual and institutional perspectives on issues like campus climate, race, class, and gender disparities, LGBTQ student experiences, undergraduate versus graduate students, faculty and staff from varying socioeconomic backgrounds, students with disabilities, undocumented students, and the intersections of two or more of these topics. Taken together, this volume presents an evidence-backed vision of how the twenty-first century higher education landscape should evolve in order to meaningfully support all participants, reduce marginalization, and reach for equity and equality.

The Real World of College Wendy Fischman, Howard Gardner, 2023-08-01 Why higher education in the United States has lost its way, and how universities and colleges can focus sharply on their core mission. For *The Real World of College*, Wendy Fischman and Howard Gardner analyzed in-depth interviews with more than 2,000 students, alumni, faculty, administrators, parents, trustees, and others, which were conducted at ten institutions ranging from highly selective liberal arts colleges to less-selective state schools. What they found challenged characterizations in the media: students are not preoccupied by political correctness, free speech, or even the cost of college. They are most concerned about their GPA and their resumes; they see jobs and earning potential as more important than learning. Many say they face mental health challenges, fear that they don't belong, and feel a deep sense of alienation. Given this daily reality for students, has higher education lost its way?

Fischman and Gardner contend that US universities and colleges must focus sharply on their core educational mission. Fischman and Gardner, both recognized authorities on education and learning, argue that higher education in the United States has lost sight of its principal reason for existing: not vocational training, not the provision of campus amenities, but to increase what Fischman and Gardner call “higher education capital”—to help students think well and broadly, express themselves clearly, explore new areas, and be open to possible transformations. Fischman and Gardner offer cogent recommendations for how every college can become a community of learners who are open to change as thinkers, citizens, and human beings.
