The Leader in Me Stephen R. Covey, 2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Going to Scale with New School Designs Joseph P. McDonald, Emily J. Klein, Meg Riordan, 2009-08-08 Since it was first invented, Americans have been trying to re-design the American high school. One of the latest approaches funded by the Bill and Melinda Gates Foundation is to find inventive high school designs that work well in one location and replicate them in other locations. The authors of this book followed a design team from Big Picture Learning as it worked to do exactly this,

recording the challenges it faced, and the strategies it employed. Their accessible and entertaining account of Big Pictures work is laced with stories about scaling up by other school design teams, and in other enterprises beyond high school. Based on careful research, the book is both a practical guide to a new dimension of school reform, and also an interesting read for anyone interested in school change.

America's Public Schools William J. Reese, 2011-04-01 In this update to his landmark publication, William J. Reese offers a comprehensive examination of the trends, theories, and practices that have shaped America's public schools over the last two centuries. Reese approaches this subject along two main lines of inquiry—education as a means for reforming society and ongoing reform within the schools themselves. He explores the roots of contemporary educational policies and places modern battles over curriculum, pedagogy, race relations, and academic standards in historical perspective. A thoroughly revised epilogue outlines the significant challenges to public school education within the last five years. Reese analyzes the shortcomings of “No Child Left Behind” and the continued disjuncture between actual school performance and the expectations of government officials. He discusses the intrusive role of corporations, economic models for enticing better teacher performance, the continued impact of conservatism, and the growth of home schooling and charter schools. Informed by a breadth of historical scholarship and based squarely on primary sources, this volume remains the standard text for future teachers and scholars of education.

But for Troy, Gabriella, Chad, and Taylor, this vacation is no day at the beach; they're all working at a country club founded by none other than Ryan and Sharpay's grandfather! But this year, Sharpay faces some tough competition—Gabriella! To have any hope of coming out on top, Sharpay knows that she'll need a secret weapon. She dumps Ryan and starts wooing Troy to be her new partner. Gabriella is less than thrilled that Troy has fallen under Sharpay's spell. How could he do that to her? Things are heating up on the lawns of high society. Will Troy and Gabriella realize that they're meant to be? Or is it already too late for them to sing one last song together?

High School Sara Quin, Tegan Quin, 2020-10-06 NEW YORK TIMES AND NATIONAL BESTSELLER First loves, first songs, and the drugs and reckless high school exploits that fueled them—meet music icons Tegan and Sara as you've never

known them before in this intimate and raw account of their formative years. *High School* is the revelatory and unique coming-of-age story of Sara and Tegan Quin, identical twins from Calgary, Alberta, growing up in the height of grunge and rave culture in the '90s, well before they became the celebrated musicians and global LGBTQ icons we know today. While grappling with their identity and sexuality, often alone, they also faced academic meltdown, their parents' divorce, and the looming pressure of what might come after high school. Written in alternating chapters from both Tegan's point of view and Sara's, the book is a raw account of the drugs, alcohol, love, music, and friendships they explored in their formative years. A transcendent story of first loves and first songs, it captures the tangle of discordant and parallel memories of two sisters who grew up in distinct ways even as they lived just down the hall from one another. This is the origin story of Tegan and Sara.

Engaging Schools Institute of Medicine, National Research Council, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Increasing High School Students' Engagement and Motivation to Learn, 2003-12-21 When it comes to motivating people to learn, disadvantaged urban adolescents are usually perceived as a hard sell. Yet, in a recent MetLife survey, 89 percent of the low-income students claimed I really want to learn applied to them. What is it about the school environment—pedagogy, curriculum, climate, organization—that encourages or discourages engagement in school activities? How do peers, family, and community affect adolescents' attitudes towards learning? *Engaging Schools* reviews current research on what shapes adolescents' school engagement and motivation to learn—including new findings on students' sense of belonging—and looks at ways these can be used to reform urban high schools. This book discusses what changes hold the greatest promise for increasing students' motivation to learn in these

schools. It looks at various approaches to reform through different methods of instruction and assessment, adjustments in school size, vocational teaching, and other key areas. Examples of innovative schools, classrooms, and out-of-school programs that have proved successful in getting high school kids excited about learning are also included.

The Productive High School Joseph Murphy, 2001-02-20 Murphy and his colleagues discuss how reform based on empirical evidence and a robust set of theories can create productive high schools for all students. Focus is on core technologies of learning and teaching, organizational systems, and institutional linkages between schools and their environments. Using current research and case studies from successful schools, they show how to construct models of learning-driven school communities that encourage excellence. Key concepts cover: defining the learning imperative; developing humanized and intellectual relationships for learning; laying the groundwork for dynamic, adaptive change; and building linkages with home and family.
